4. Scope

In Scope

- Centralized web-based information hub focused on communities affected by flash flooding in Nepal and Tibet
- Background information and disaster summaries on recent flood events
- Current relief updates that will be provided by participating organizations
- Publicly confirmed and reliable information regarding missing or deceased individuals
- Directory of participating organizations and NGOs involved in relief efforts
- Verified external links directing users to legitimate donation websites
- Administrator-managed content updates (adding/editing information displayed on the site)
- Built-in search and navigation features that allow users to easily find the information they need
- Basic categorization/filtering of content (ex. By region, organization, or update type) to support the on-site search and navigation
- Administrator login and dashboard to edit content

Out of Scope

- Direct processing or handling of donations within the participating organizations
- Management or coordination of rescue operations
- Independent verification of missing/deceased person reports (the system will display only publicly confirmed information from existing sources)
- Real-time alerts
- Communication/messaging features between users, volunteers, or organizations.
